**ABOUT:**

Architectural designer based in Copenhagen Denmark. Experience in high end residential architecture; remodels, additions, and ground up projects. Skills in digital drafting, modeling, drawing, prototyping, and fabrication. For the last three years I have worked under Aleck Wilson as a Designer. Aleck runs a small office in San Francisco, my role in the firm is to produce large sets of drawings and rapidly iterate designs with my team and external consultants.

I have a masters degree in Architecture from the Royal Danish Academy. During my education, I focused on exploring methods of upcycling architectural fragments into unique and storied functional objects for the home. As well as, creating symbiotic networks and partnership within the industry to save materials from being discarded. I have a strong understanding of material driven design processes and a knowledge of craft in different mediums, wood, metal, stone. I love to zoom in and out, working on small details and to a large drawings with equal care.

**EDUCATION:**

MA Architecture, Strategic Design Royal Danish Academy, Copenhagen, Denmark	2021-2023
Ballard Woodworks	Summer 2019
